## PROFILE

---

Highly motivated software engineer who has completed an Intensive Full Stack Software Engineering Bootcamp at Makers Tech Academy. A career changer who wants to be a part of an exciting and ever-growing industry, utilising the excellent creative and logical thinking skills developed from accomplishing a degree in Accounting & Finance

## EDUCATION

---

### Makers Full Stack Academy

*Full Stack Intensive Bootcamp*

UK, London

*Aug. 2022 – Dec 2022*

### Coventry University

*Bsc Accounting & Finance 2.1*

UK, Coventry

*Sep. 2014 – June 2017*

## EXPERIENCE

---

### Financial Accountant

*Brick By Brick*

Aug. 2020 – June 2021

*UK, London*

- Streamlined month end processes and reduced overall time from 10 days to 7 days
- Mentored subordinates and assisted in preparing them for their Accounting exams

### Accounts Assistant

*Battersea Power Station*

Sep. 2019 – Apr. 2020

*UK, London*

- Took initiative and migrated over 2000 invoices over from Microsoft Navision to Microsoft Dynamics 365
- Developed VBA macros to automate tedious tasks in Microsoft Excel

### Purchase Ledger Clerk

*Paced Ltd*

Nov. 2018 – Sep. 2019

*UK, London*

- Developed AHK and Python scripts to automate morning routine, improving overall efficiency
- Saved £3,000+ in carriage costs due to recommending to logistics to switch couriers through extensive research
- Took initiative and took on additional responsibility from the management accountant and took full ownership of several month end processes

## PROJECTS

---

### To-Do List | *MongoDB, Express, React, Node.js, Bootstrap*

[Code](#)

- Developed a full stack program to help me manage tasks throughout the day. Users can register, log in, add to-do's, delete and update existing to-do's
- Implemented CI/CD using nodemon to see changes in real time
- Incorporated Bootstrap for clean, slick component styling
- Implemented Redux, Middleware and Thunks for a more reliable backend code base

### Rat Race | *HTML, CSS, Javascript, React*

[Code](#)

- Developed a front-end web application based off Snakes & Ladders collaboratively with 6 others using React as the frontend
- Implemented version control via git and branch merging
- Successfully troubleshoot problems through trello board tickets while collaborating and pair programming to work through problems

### Adopt a Pet | *HTML, CSS, Javascript, React*

[Code](#)

- Developed a front-end web application with data being fed from a public API highlighting pets for adoption within the US
- Implemented the ability to filter search parameters
